CHAMPION STRUT®

For Long-lasting Project Performance, Champion Strut is a Complete System of Fiberglass Channel & Non-metallic Components.

Features:

These components include fittings, threaded rods, pipe clamps, fasteners, nuts and accessories, pipe and conduit hanger types, pipe hanging accessories, as well as wall support racks for framing and mounting conduit and mechanical piping. The channels are supplied in standard 10-foot lengths.

Multiple strut channel profiles to accommodate any application

Non-metallic – available in both polyester (dark grey) and vinyl ester (beige) resin systems

A complete line of corrosion-resistant fiberglass components provides durability and contribute to project longevity

UV resistant – fiberglass channels incorporate UV inhibitors and surfacing veil which improves weatherability and inhibits UV degradation

Fire retardant for added protection

Lightweight for smooth and fast installation

Easy to field cut and drill – Supplied in standard 10-ft lengths with 20-ft lengths available upon special-order request

CS-SST Series Channel (only) will accommodate rigid conduit steel pipe straps
