Champion's Products Meet the Requirements of BABA

When customers request information from Champion Fiberglass, Inc.'s ("Champion") products, it may be for submitting bids (directly or through a prime contractor) to a federal or state agency for a federally funded infrastructure project subject to the Build America, Buy America (BABA) Act. Champion's products meet BABA requirements for construction materials.

Specifically, Champion's products meet the "Produced in the United States" requirement in 2 CFR 183.4 and 183.6, because all manufacturing processes (from initial combination of polymer-based inputs or composite materials until Champion's product is in its final form) occurred at Champion's Spring, Texas, USA facility.

With all "manufacturing processes," as defined in 2 CFR 184.6(a)(2), occurring at one location, Champion's BABA certifications for specific projects will be simple, with no certifications from additional suppliers or fabricators needed.

As of January 1, 2026, Champion's products are:

- Champion Duct Conduit
- Champion Fiberglass Elbows
- Champion Strut
- Champion Bridge Hangers
- Champion Haz Duct
- Champion Flame Shield Phenolic Conduit
- Champion Bridge Drain

Should you need additional information or further certification, please feel free to contact us directly.

Sincerely,

Goran Haag
